## TAKING YOUR BUSINESS TO NEW HEIGHTS

### MEET THE NITRO 7310

Stand above the competition with 78" of crop clearance that allows you to spray at all stages of the growing season while minimizing crop damage. You'll be more efficient than ever with productivity-increasing features:

- Adjustable crop clearance from 72" to 78" allows the operator to choose the best height for their crops and is great for transporting or getting into low overhead shop doors
- Comfortable, ergonomically designed cab and redesigned lift arms provide a panoramic view of the front boom
- Increased torque and fuel economy from electronically controlled planetary drives that reach up to 35-mph road speeds
- Even weight distribution and lighter than previous models for less soil compaction
- Powered by a reliable and fuel-efficient 310-hp FPT engine
